THE WORLD OVER

WINTER AIDS THE RUM RUNNERS

ULTIMATUM SENT TO AUSTRIA

JERHOL INVASION PLANNED SOON

BARNIA, Ont.—Boating here across the ice of St. Clair River to Michigan from Ontario is the newest winter trade. The ice 14-year old rum runner, Jack P. Hume, has been making his first discovery at South Park one day last week when they seized a Canadian boat containing 11 cases of Carlsberg beer.

The inspector saw two lids with a sled on the ice. They dropped the sleds and skated away as the officers approached on the ice.

With the freezing of St. Clair river some activities have increased to a large extent.

BOMB—Gloria D'Ialla on Friday published the text of what it called a virtual ultimatum that France with Great Britain's aid, would use force to bring the Austrian government to a halt in which to set up of arms and supplies allegedly concentrated in that country in violation of the treaty says of the treaty of St. Germain.

The note was kept secret, the Gloria D'Ialla said, because responsible French circles realized that the ultimatum was not to be taken seriously but to lay themselves open to public judgment.

The note evidently referred to the reported shipment of 40,000 rifles and 200 machine guns from Italy to Austria recently, although it did not mention the specific origin of the arms according to the Gloria.

MANCHURIA—Along the frozen snow-blanketed roads which wind south and west from Mukden soldiers are moving day and night to lose marching order toward the Japanese border. Japan is getting ready to attack.

Japanese troops and the armed forces of Manchuria, probably 250,000 strong, are marching to the mobilization points from which the long-planned Jehol invasion will begin. It will be a drive along a 200-mile front and it may become the most serious clash between China and Japan since they declared war began in September, 1931. At least half of the force is made up of Japanese veterans who went through last year's Manchurian campaign. Against them China can throw 150,000 men, strong in numbers but weak in organization.

The oldest officers of the Japanese army in Manchuria have been assembled to direct the drive. Aeroplanes, tanks and armored cars also are ready for action.

One factor to be reckoned with, say the Japanese, is that Tang Yulin, the Chinese governor at Jehol, has been spurred to desperate resistance because his wife is held a hostage at Peking.

CARBON, ALBERTA, THURSDAY, FEBRUARY 23, 1933

HEKETH MASQUERADE DRAWS LARGE CROWD

The masquerade dance put on in the community hall, Heketh, last Friday night proved beyond all expectations and one of the largest crowds for some time turned out in support of the event.

The following were prize winners: Best dressed lady, Miss Betty Laine; Best dressed gent, R.C. Bell; Most original costume, Miss Isabelle Fraser; Gents, Lorne Hughes.

Prizes were also given to the winners of the dance. Mrs. H. H. Mander, Mrs. W. H. Mander, Mrs. W. H. Mander, Mrs. W. H. Mander.

The Carbon orchestra furnished excellent music for the occasion. Members of the orchestra are: Miss Kathleen Watkins, Dick Gilmel, J. Spencer and Aaron Klassen.

ALBERTA NEWS

Alberta's production of petroleum for 1932 totalled 317,422 barrels, valued at \$2,445,325.25, according to a statement just issued by H. H. G. Reid, Minister of Lands and Mines. The figure shows a decline in production from 1931, for which the total was 345,195 barrels valued at \$4,221,254.

The total production of natural gas in the province was 15,598,543 thousand cubic feet, valued at \$66,342.22 on the basis of a price of three cents per 1000 feet at the well-head.

Strikes for the world grain congress at Regina from this province now total 315, according to the provincial field crops branch statement below the final closing date. This is a much better showing than was anticipated.

Financial statements of twelve of the largest towns in Alberta, including the city of Red Deer, show a variety of conditions. Of the twelve, the statistics show that nine of them have money in the bank and only three have any bank liability. The cities of Red Deer, Calgary and Lethbridge are the only ones with bank liabilities.

A decrease of more than 1000 in the total number of accidents in the province reported to the workmen's compensation board is shown in the report of the board for 1932 laid before the provincial legislature. The number reported for the year was 8,574. Payrolls of the province reported in 1932 totalled only \$40,000,000 in 1932 compared with \$75,000,000 in 1931.

Compensation paid to injured workmen totalled \$47,937. Of the accident reported, were fatal, 38 were permanent injury, while 345 were temporary injury.

Alberta's fur trade is expanding, according to the results of the fur sale already held this season, four of which already have been held. Ermine is forming a large part of the fur being sold. In 1929 pelts were offered at the last sale. Last year more than 267,000 pelts of ermine were sent out of the province. This figure is expected to pass the 300,000 mark this season.

Motor traffic into Alberta last season totalled more than 21,000 cars, according to figures released at Ottawa. Of this number nearly 4000 registered in for a stay of up to 60 days.

Nearly 300 pupils are registered this winter in the correspondence course in school work conducted by the provincial education department for benefit of children in outlying districts.

The course has to do only with public school work thus far, but the possibility of extending it to include high school work is being considered.

Carbon Juniors Win From Rockyford

On Saturday afternoon the Rockyford Juniors played a return game at the local rink with the Junior team and the Carbon boys won out 3-2 in a fast game of clean hockey.

Carbon's line-up: B. Malton, goal; C. Gordon, Sam Poon, C. Reed, defence; W. Barry, F. Poon, Chuck Perkins, W. O'Hara, H. Wain, attack; Wain, Bruce Ramsey acted as referee.

After the game the local boys entertained the visitors with a lunch in the waiting room of the skating rink.

At this time the Carbon Junior hockey team wish to thank the ladies of town for any donations towards the entertainment of the visitors.

CARBON TEAM WINS AGAINST NEWCASTLE 2-1

After a much delayed hockey game on Sunday, due to the late arrival of the visitors, the Carbon hockey team won over the Newcastle team of Drumheller by a 2-1 score in an evening game.

Newcastle was scheduled to play in the district final but did not arrive and to give the fans a game two local teams were chosen. After about thirty minutes of play the visitors showed up on the scene about 1:30 and within the hour the game was arranged to start at 7 p.m.

Newcastle scored in the first period by a goal from the players' bench. Carbon scored in the second period and at the end of the third period no further scoring resulted and the game ended in a tie.

Minutes were played each way and still no score. Another five minutes each way was then decided upon and after about three minutes of play W. Poon tallied for Carbon. After the goal the fans gained the lead they held it throughout the remainder of the evening.

Carbon's line-up: L. Halstead, goal; H. McPherson and E. Houlton, defence; Ramsey, W. Poon, Bruce Ramsey, H. Thompson, F. Poon, John Knox and A. Dunbar.

Shorty Bernard acted as referee.

SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Notice is hereby given that pursuant to section 48 of The Domestic Animals Act (Impounded), that 19 dogs (9 cows and 10 horses) two of the more recent years of age, the other seventeen between ten months old, were impounded in the pound kept by Samuel Salter located on the North East of section 15-28-22 with, on Friday the thirty-first day of January A.D. 1933, and that the said animals were sold on the 21st day of January 1933 to: Chas. Martin, Carbon, Alta.; Jacob Salter, Red Deer, Alta.; Harry O'Farrell, Red Deer, Alta.; Bredford, Calgary, Alberta; P. Brown, Red Deer, Alta.; John Nelson, Carbon, Alberta; John Fensch, Carbon, Alta.; Edwin Zeiler, Carbon, Alberta; Arthur Bailey, Red Deer, Alta.; John Schmitt, Carbon, Alta.; John Clark, Carbon, Alta.; and that said animals may be redeemed by the owner or his agent within a period of three days from publication of this notice in the ALBERTA GAZETTE.

Witness my hand and seal of the municipality and the purchase of said animals.

OHLSHAUSER-BETTSCHER

A pretty wedding was celebrated at the home of Mr. and Mrs. Wm. Bettscher on Thursday, Feb. 23, 1933, when their daughter, Anita, became the bride of Mr. Fred G. Ohlschauser.

The bride was dressed in a gown of white lace and was assisted by Miss Anita Glick, who wore a dress of green and white. The groom was supported by Dorothy Ohlschauser Jr.

Rev. Mr. Wahl of Trochu performed the ceremony and Mrs. Paul Ohlschauser acted as the best friend.

The nuptials were beautifully decorated for the occasion in green and white and about 150 guests were present.

Mr. and Mrs. Ohlschauser will reside on the farm of Gathil Ohlschauser, south of town.

All Councillors Elected in M.D. By Acclamation

NO ELECTIONS IN M.D. CARBON

The annual meeting of the trustees of the Municipal District of Carbon was held in the Masonic hall last Saturday afternoon, February 18th, and a large crowd turned out.

The financial statement for 1932 was reviewed and a few other questions were discussed all of which were of minor importance.

Following the meeting, at 4 p.m. the Returning Officer, Mr. L.H. Hart, declared that nominations would be received for councillors in divisions 2, 3 and 4. Also for member on the Drumheller hospital board.

In each division only one nomination was received. This was also the case in the member for Hospital Board, and as a result no elections will take place in the Municipal District of Carbon this year.

The following nominations were received in divisions 2 and 3: name G. Ohlschauser and W.H. Levine, proposed to allow themselves to be re-nominated. Nominations in division 4: name Mr. P. H. Mander, 1933 and Mr. P. H. Mander, 1934.

Mr. Mander (1933) and Mr. P. H. Mander (1934) were re-nominated in Division 4. Those having no other nominations, those who were declared without re-nomination.

For member on the Drumheller Hospital Board, Chas. Webster was the only nomination received and he was declared elected by acclamation.

LOCAL WINTER FESTIVAL TO BE ON NEXT WEEK

With a mild spell this week the local curriers are looking for ideal weather all next week with everything favorable for their annual bazaar, which will be held on Wednesday, Thursday, Feb. 23, March 1 and 2.

A large prize list is being arranged and it is expected that three competitions will be played as usual this year.

A large entry of skis is almost sure to result. Carbon will have about a twelve rink. Skis will be sent about five, Bromellier two, and Arno and Rockford are almost sure to be represented by a rink or two from each place.

The ladies will serve lunch at the rink again this year and Carbon's annual winter festival has all the earmarks of a grand success.

Oil Well May be Within City of Calgary Limits

With the intention of drilling an oil well this spring within the city limits, a mile south of Ogden, Franco-Chad, Ltd. has been discovered by Edward Hodgson, Victoria mining engineer, in 1930.

It is situated in townships 22, 23, 24 and 25, range 26, west of the 11th meridian, as well as in the same townships in range 1, west of the 5th meridian. Both gas and oil are said to be in this area. Dr. H. H. Mander has indicated that efforts are being made to find any new oil fields in the area. It is well known that the company is endeavoring to acquire the rights to the oil field.

The company has an authorized capital of two million shares of one dollar value, under Dominion charter. Mr. Hodgson is president of the company. Dr. Austin Lane, Calgary, and Victor Parlin, Paris, journalist, are vice-presidents. E. L. Sanford, Calgary, is secretary. A. Macdonald, Calgary, and J. K. Tait, Victoria, are also on the board.

SPRING REPAIRS

WE HAVE ENDEAVORED TO STOCK A COMPLETE LINE OF HARDWARE FOR THE SPRING WORK AND REPAIRING. COME IN AND CHECK OVER OUR STOCK AND COMPARE OUR PRICES. YOU CAN BUY CHEAPER HERE AND WE GUARANTEE SATISFACTION.

Harness --- Repairs

1 1/2 in. by 22 ft TEAM LINES, \$175
1 1/2 in. TEAM LINES, \$100

Population of World Shows A Steady Increase According To The League Of Nations

The Statistical Department of the League of Nations has been counting down, and gives the figure of the world's population, as at the end of 1931, at about two billion twelve million eight hundred thousand.

More than half of these people live in Asia. In fact, it is the most populous continent, having an excess of some 252 million inhabitants over all the other continents combined. Asia also has the most rapid increase in population in comparison with other parts of the world.

Europe, for the first time in history, has more than half a billion people. On the first of January, 1932, the figure representing its population was greater than 500 millions. The figure for the same date, 1931, was 488 millions.

The North and South American continents were inhabited by some 225 millions of persons at the end of 1931—an increase of four millions over the year previous.

The vast continent of Africa counts scarcely 142 millions of inhabitants. And interesting to note, the figure, for 1931, is two million less than for 1930. This is the only decrease recorded by any of the continents.

Australia, the remaining continent, supported but ten millions of people at the end of 1931.

Some of the statistics given for the major countries of Europe are interesting: Russia, 127 millions in 1931 against 124 millions in 1930; Germany, 64 millions; France, 42 millions; Great Britain, 42 millions; Italy, 41 millions; Poland, 24 millions; Spain, 24 millions; Greece, 4 millions.

The world's population is increasing. That fact is one that has ramifying implications, and if the growth continues at the present rate, it will be less than half a century it will be one of the most pressing problems that will have to deal with.

Fertilizing Pasture Lands

Best Results Obtained When Continuous Grazing Is Practised

Pasture land fertilized at the rate of 475 pounds per acre of a complete fertilizer was able to carry 2.15 cows to the acre when continuous grazing was practised. The same kind of land similarly fertilized but grazed rotationally was able to carry only 1.7 cows to the acre, and the unfertilized and land unfertilized and continuously grazed carried 1.40 cows to the acre. These results were obtained by the Dominion Department of Agriculture at the Experimental Farm, Nappin, N.S. In practice the number of cows varied from week to week according to the condition of growth; and by careful calculation dependable results were obtained. In addition to the pasture the cows received a ration of milk given at a rate consistent with the amount of milk given. The field used in this experiment had been in use as pasture for most of the twenty-five years it had been in use.

The results of this experiment go to show a saving of 1.3 pounds of meat per cow per day on the fertilized rotationally grazed area and 1.96 pounds on the fertilized continuously grazed area, as compared with the unfertilized area.

Loosing Their Manners

Conversion In Some Homes Impossible Since Braid Arrived

Has the radio developed a people with declining manners? It used to be considered the height of ill breeding, in the good old days, for anyone in the room to interrupt a conversation between guest and host; but those days are gone forever in radio homes, where it is very common for some one thoughtlessly or by design, to turn on the radio, and get a leather-lunged announcer bellowing babyhood, or a singer screaming the latest jazz song to the utter disruption of conversation on any subject. And it would be insulting the whole family if one made an observation on this utter lack of good manners.

"You only married me because my aunt left me some money."

"Talking of the kind, I'd have married you regardless of how left it to you."

Glasgow, Scotland, plans to provide recreational and educational facilities for its unemployed.

W. N. U. 1932

THE NEW MISSIONARY

(The British Government's war debt mission arrives to "talk it over" with the United States on war debts).—Stature in the Daily Express, London.

Size Of Ranch Floors

Income Received Is Affected By Number Of Breeding Ewes

The number of breeding ewes per ranch is an outstanding factor affecting the income received by range sheepmen in Alberta and Saskatchewan, according to an economic survey of the range sheep industry conducted during the past three years by the Agricultural Economics Branch and Experimental Farms Branch of the Federal Department of Agriculture. In analysing the relation of size of business to income the records of 87 ranches were grouped according to the number of breeding ewes per ranch: 11 ranches had over 500 breeding ewes; 25 between 500 and 1,000; 1,000 and 1,500; 5 between 1,500 and 2,000; 2 between 2,000 and 2,500; and 7 ranches had over 3,000 breeding ewes. Ranches with had between 1,500 and 2,000 breeding ewes per ranch had an average ranch income of \$111, whereas those who had between 1,000 and 1,500 breeding ewes secured \$120.25. The income per ranch was thus found to increase with an increase in the number of breeding ewes until the size group 2,000 to 2,500 was reached and from this point declined, indicating that these sheep ranchers who had between 1,500 and 2,000 breeding ewes had about the right balance between the number of ewes, amount of range, labor and equipment per ranch.

A Discriminating Buyer

British Consumer In Most Particular When Purchasing Poultry

When studying the poultry trade in the British market Mr. W. J. Brown to the Dominion Department of Agriculture, found that the British consumer is a discriminating buyer. Mr. Brown concludes, from his observations and interviews with market men that five essential points have to be observed in the building up of a satisfactory trade in the British market: (1) High standard of quality; (2) Absolute uniformity in grading; (3) Proper variety with a minimum of tolerance; (4) Attractive display, including both packages and individual birds; (5) Delicacy of quality and flavor that is pleasing to the consumer.

"Young man, my daughter says you're planning to elope with her, and I want to give you fair warning."

"Well, sir, what is it?"

"That ladder of mine out in the garage is cracked!"

An alarm clock that makes tea before rousing its possessor has been patented in England.

EX-KING'S EXILED COUSIN RELATES EXPERIENCES

Don Alfonso de Bourlon, Marquis de Biquiche and cousin of the ex-King of Spain, is shown (left), relating to a journalist the experiences which he and twenty-eight monarchist prisoners suffered after escaping from the Spanish penal settlement of Villa Clara in West Africa. These monarchist leaders travelled across the Atlantic from Africa to Portugal in a thirty-ton vessel and suffered many privations in the 1,000-mile trip.

Spinach and Carrots

New York Surgeon Told Women How To Become Beautiful

Any woman can be beautiful, according to Dr. J. Howard Crum, plastic surgeon of New York—but she must be willing to eat spinach.

"What you eat is the answer to how fast you age," Dr. Crum told delegates to the trade display and fashion show which continued here today. He then promised a beautiful complexion to any woman who would eat each day a generous portion of a thin-fleaved vegetable followed with a good dose of spinach or carrot and top them off with a quart of milk.

"Worry and fear are to be avoided at all times," the surgeon advised. "Nothing detracts so much from your looks." Most stage and screen beauties, he said, have "acquired their attractiveness."

Life Of Weed Seeds

Experiment Proves Some Germinate Strongly After Forty Years

An experiment to test the vitality of weed seeds has been reported by the Dominion Department of Agriculture. Seeds of many kinds of weeds were mixed with sand and placed in unopened pint bottles and buried twenty inches below the surface. The bottles were sealed with the mouth downward to prevent the accumulation of water in the bottles.

The experiment has been carried on by the Michigan Agricultural College, and it has been found that after forty years buried in this way seeds of Black Medick, Peppercorn, Fig-wed, Ragweed, Wild Yam, Common Plantain, Purslane, and Curled Dock germinated vigorously.

These remarkable results led the Dominion Agronomist to ask the question "Who knows how long weed seeds will last?"

Greatest and Smallest Length

The greatest length actually measured is that from the earth to the most distant known asteroid, or about 140,000,000 light years. The smallest known length is the estimated diameter of the nucleus of a hydrogen atom, set down as a little more than one-millionth of an inch.

Only Half College-Bred

Half of the 56 signers of the Declaration of Independence were college-bred; 16 had "classical" education; 2 were instructed entirely by tutors; and 16 had very little learning.

Because of the congestion it causes to traffic the annual Lord Mayor's Show in London may be abandoned.

Cost Of Operating And Maintaining Port Of Churchill Will Always Be Very Moderate

No Latchkey Needed

Always a Door-Man At Number Ten Downing Street

However late the hour, Premier Ramsay MacDonald and members of his family never have to worry about being locked out of their London home.

For No. 10 Downing St., home of England's premier and the most famous house in London, is claimed to be the only private residence in the capital to which no one needs a latchkey.

Thanks to David Lloyd George, war-time premier, "10 Downing" has a door attendant night and day, and there is always a doorman on duty, ready to admit the hour.

When Lloyd George came into power and took up residence at Downing St., there was a little wooden knob hardly perceptible on the door and the knocker, and by pulling the knob a string inside attached to it raised the latch, and the culter entered.

The simple village method did not appeal to Lloyd George, especially in war-time, and instructions were given for the door to be manned night and day.

Up to the first year of the war it would have been possible for any stranger to have pulled the latch and entered the premier's residence, but nowadays every visitor is carefully scrutinized and asked his business before being permitted to enter even one of the ante-rooms.

The Chickens Of Today

The Old Red Hen Ain't What She Used To Be

The old red hen "ain't what she used to be," Professor J. C. Graham, head of the poultry department of the Massachusetts State College, said.

The chicken of today is forced into early maturity and is kept operating at a speed which would have killed her 1000 ancestors. In the old days a chicken was born and a few days later she was out in the yard juggling at worms. Now many of the incubator-hatched chicks never get out of a building until their laying days are over.

Back a few years ago the ordinary hen started laying at eight to 10 months, but now the poultry man has hastened things along so that he expects her to be laying at five to seven months.

A Promising Trade

Great Britain Offers Market For Canadian Cattle Feeds

According to the United Kingdom Trade Commissioner, a promising trade in cattle feeds is in prospect in the British market. In the January 21st issue of the Commercial Intelligence Journal it is stated that the exportation of cattle feeds, consisting of bran and other flour milling offal, from Canada is comparatively new, beginning in 1921 when Canadian shipments rose from practically nil to 22,260 long tons (2,226 tons). Of this amount 6,000 tons were shorts and middlings, and the remainder bran. According to this report Great Britain imports about 36,000 tons of these products annually, chiefly from foreign countries. Empire countries producing only some 70,000 tons in 1932.

Smallest New Testaments

One Used In Australia For Swearing—In Wisconsin

The two smallest New Testaments in the world are believed to be in Australia. One belongs to Major Joseph, chief of the Commonwealth investigation Branch. It is less than three-quarters of an inch long and half an inch wide, and is used for swearing witnesses.

The other Testament has been presented to the Commonwealth National Library by Mr. Robert Hare of Essex, England. Its measurements are length, three-quarters of an inch; width, five-eighths of an inch; thickness, a quarter of an inch.

White Bread Forbidden

White bread will be forbidden, until next harvest, to soldiers, policemen and boarders in schools and colleges in Rumania. Instead, they will receive rye bread and a kind of stiff porridge made of maize.

One liner carried 10,000 bags of Mexican mail from Britain to America in December.

Owing to natural breakwaters the cost of opening and maintaining the port of Churchill will always be moderate whether the traffic be heavy or light. D. W. MacLachlan, engineer-in-charge of the Hudson Bay Company, told the Engineering Institute of Canada at the concluding session of its annual meeting at Ottawa.

Natural breakwaters or jetties at the entrance to Churchill harbor, he explained, direct the tidal currents so that they perform a perpetual service by their scouring action in keeping the harbor from filling up. There are no wide tidal flats or currents to deal with.

The expenditure to date chargeable to the Churchill development amounts to about \$250,000, he stated. Mr. MacLachlan, with work still to be done the cost on completion will be about \$15,000,000. The net cost, according to Mr. MacLachlan, should be down to \$12,000,000 if the dredging plant can be sold for half its original cost. The net cost is made for an amount of \$625,000 incurred through taking over plant formerly charged to the works at Port Nelson.

The railway work expected to complete the initial developments at Churchill, Mr. MacLachlan said consists of one season's covering with one dredge, an additional season's work in connection with delivering the water supply; a small amount of work on the water supply line; extension of the water supply line; and some further shoring up of the face of the deep water dock.

The water supply of Churchill was one of the unique features of the development. Provision of water for locomotives, ships and camp in general was a difficult matter as there were no creeks of any size. The plan adopted was to excavate a reservoir at Grand Shanty, 10 miles from Churchill, and to pump the water to the city, having a capacity of 17,000,000 gallons.

A pumping station and tanks were provided and a 10-inch pipe line carries the water across the country to another tank within the townsite of Churchill.

Ruling On Cattle Export

Puts Canadian Exports On Equal Footing With Competitor

The United Kingdom agreement, as now ratified, puts Canadian cattle exports on an equal footing with competitors in the British market, for the first time in thirty-seven years. The segregation of store cattle from that of cattle moving for export is no longer required. Fat and store cattle are allowed to move freely to inland points, with the understanding that livestock matter as there were no crises of any size. The plan adopted was to excavate a reservoir at Grand Shanty, 10 miles from Churchill, and to pump the water to the city, having a capacity of 17,000,000 gallons.

A Powerful Engine

Practically Runs Itself and Replicates Its Own Fire

The Super-Motors, declared to be the most powerful railway engine in the world, has just been completed at the works of the French State Railways in Brestville-Brest. It will develop 2,800 horsepower. The engine practically runs itself, nearly all the work in setting up the engine is done by its boiler fire with regular amounts of coal when necessary.

The Largest Organ

The latest organ in the world is in a cathedral in Liverpool, England. The instrument has five rows of keys, 22 draw knobs, 108 stops and 10,024 pipes. It is played by electro-pneumatic action, the mechanism being driven by motors with a total of 25 horsepower.

Act at once! A sluggish appetite, a weak digestive system, a loss of energy, a need for every morning.

TAKE ENO'S FRUIT SALT

WORLD HAPPENINGS BRIEFLY TOLD

No consideration has been given to the matter of establishment of a national wheat marketing board, Prime Minister R. B. Bennett stated in the House of Commons.

Conditions on Tatted Kingdom apple markets are on the whole dull and sales discouraging, according to information received by the Dominion Department of Agriculture.

Canada will have no official Scout contingent at the 1933 world Scout jamboree at Godol, Hungary, in August, it has been decided by Dominion Scout Headquarters.

Planning to establish a beet sugar refining plant, A. D. Hissauer, of Amsterdam, Holland, who is associated with one of the world's largest sugar factories, has arrived in Winnipeg.

The Japanese imperial parliament, approved by a standing vote, the largest budget in the history of the nation, totalling 2,239,000,000 yen (about \$480,000,000).

The report of unclaimed bank balances tabled in the House of Commons by Hon. E. N. Rhodes, Minister of Finance, reveals that there is \$4,860,198.75 of unclaimed money in the banks throughout Canada.

According to a special London cable to the New York Times, the admiralty has announced its first contract for fuel oil extracted from British coal had been placed with a British firm.

Use of intravenous injections of the colloidal solution of metallic arsenic have proved successful in the treatment of bone sarcoma, one of the most terrible types of cancer, according to the Canadian Medical Association Journal.

A favorable report on the treaty with Canada for construction of the gigantic St. Lawrence waterway and power project has been voted by the United States Senate foreign relations sub-committee.

Improvement in Indian Home Life

Modern Methods of Living

The erection of comfortable and more commodious dwellings during the last few years has been a feature in the growth of civilizing influences among the Indians of the Prairie Provinces of Canada according to the Department of Indian Affairs. These new homes provide many conveniences and the light and ventilation that was lacking in the old—a healthier environment for the children. The new condition has encouraged the owners to appreciate the value of additional sources to augment their means of livelihood such as the cultivation of gardens, the raising of chickens and in some instances pigs, and turning their attention to milk and even to the art of butter making.

Booking Clerk at small station. "You'll have to change twice before you get to York."

Yiffner (unwashed to travelling): "Goodness me! And I've only bought the clothes I'm standing up in."

The largest railway engine built in Europe, weighing 280 tons and capable of pulling 2,500 tons, left for the Gorton Works, Manchester, of Messrs. Beyer, Peacock and Co., Ltd., for Russia.

Elk Spoil Orchard Crops in Okanagan

Had To Be Trapped When Fruit Growers Complained

British Columbia's elk are not to be converted, but are orchardists' crops. Their twin consideration have been giving provincial authorities some concern.

"We'll get rid of the elk," said provincial game warden when fruit growers in the Okanagan country complained that the herds were spoiling their crops. But they did not get rid of them in the time foreseen. Instead they trapped them.

Special corrals were built at various points in the orchard country—corrals big enough to enclose 50 animals at a time. So far only a few elk have been captured, but the game warden hopes to capture most of the animals before spring.

More than 400 elk are in the Okanagan country now, the offspring and descendants of a batch of 25 elk liberated there about seven years ago. They multiplied faster than game officials expected, and in some of the more settled areas have become a serious menace to fruit men.

The trapped elk are being transported by rail to the wilds east of Princeton and liberated there.

Used New Technique

For Delicate Operation

Discovery Made Removal of Tumor From Brain Possible

Operation on the brain for the removal of a tumor, performed recently in London Hospital, has been pronounced a success, and the patient is recovering and is again being stored. It is considered one of the most delicate surgical feats ever performed. Discovery of a new technique made it possible.

The patient, a school teacher, was going blind as a result of the tumor, which was in an almost inaccessible spot, and eventually would have spread to other parts of the brain. Five doctors, headed by Dr. H. W. L. Cairns, of the London Hospital, spent all day in the operation. By means of diathermy current the tissues of the brain were completely liquefied through to get to the tumor, by the new technique the tumor gradually went through the cells, breaking them, but healing them again as it passed on its way to the base of the trouble.

TOWN

THAT although many years were spent in investigation it was not until 1929 that it was definitely established that the nesting place of the blue goose is on Baffin Island which lies north of the Hudson Straits and within the Arctic Circle. A photograph of the bird that fed on the tholite is shown above.

The Itinerant Salesman

Takes Money Which Never Gets Back Into Local Circulation

"Madam, we can sell you these much more cheaply than any local merchant." We have no expensive store rent to pay, we do no advertising in the daily papers, we have no big overhead for trucks and deliveries, so we can sell you a beautiful five-cent piece cheaper than the stores down town."

This is the argument of the itinerant salesman at the front door. The very argument of the salesman is the best argument against the house-to-house plan, no stores would be rented, no advertising bought in local papers, no tax money collected by city policemen, firemen, garbage collectors, street sweepers, paving, city lighting, and all other advantages of a properly conducted city government.

House-to-house salesmanship by out-of-town firms who contribute nothing toward the support of the town is a growing evil.

The lesson is not amiss for the families of professional men, as they too have to contend with the tendency of the local people to take their major operations, big law suits, fine architectural jobs, engineering projects and finer dental work to out-standing men in neighboring cities.

Money spent in the home town is convenient money which the spender may get back at an early date. Money sent out of town is distant money, unlikely ever to get back into local circulation. —Kivnans Magazine.

Recipes For This Week

(By Betty Barrett)

PRUNE MUFFINS

1 cup prunes.
1 egg.
3 tablespoons granulated sugar.
3 tablespoons melted shortening.
1 cup milk.
2½ cups flour (all purpose).
4 tablespoons baking powder.

½ teaspoon salt.
Bolt prunes in water to cover 15 minutes. Drain, remove pits, and cut prunes into pieces. Beat egg, add sugar, shortening, milk, and when well mixed combine with flour sifted with baking powder and salt. Add prunes and beat just enough to mix. Pour into greased muffin pans and bake about 25 minutes in a hot oven (425 degrees Fahrenheit).

FRIED MACARONI SLICES
(Makes 4 generous servings)
½ pound macaroni (elbow preferred).
2 eggs.
¼ cup milk.
¼ teaspoon salt.

Cook macaroni until tender. Then drain. Mix the macaroni, egg, salt and milk. Press into a greased mold and bake in a moderately hot oven (350 degrees Fahrenheit) for one hour. Remove and when taken out, cut into slices. Fry in a hot oil until golden brown. Serve with crisp bacon or ham for breakfast.

"Strong Pilot who at midnight hour Could claim the sea with mighty power. Grant us the skill to aid the bark Of those who drift in storm and danger."

"Why are you fearful?" said Jesus questioned, "have ye not yet faith?—not yet, after having seen my power exercised so many times?"

Many a follower of Christ thinks he has faith, but his faith fails him in times of storm and stress. Then he murmurs, "Teacher, say, 'I have ye not yet faith?'"

The regulated mind is a mind that is stored with information, and that knows exactly where to find each of its innumerable treasures. A well-stored mind of faith is a soul richly endowed with faith, and that knows exactly where to find it when occasion for its use arises.

"We'll wars the storm to those who hear. A deeper voice across the storm!"

SUNDAY SCHOOL LESSON

FEBRUARY 26

JESUS SHOWS HIS POWER

Golden Text: "For I know Him whom I have believed, and I am persuaded that He is able to guard that which I have committed unto Him against that day."—1 Timothy 1:12.

Lesson 3: 4:35-5:20.

Devotional Reading: Isaiah 12:1-4.

Explanations and Comments

A Great Storm and a Great Calm. Jesus said: "All say that Jesus had been preaching, and that He had been no time for rest. When night came He said to His disciples, 'Let us go over unto the other side,' the other side of the lake. They obeyed, taking Him with them in a boat, 'even as He was.' What an insight into the heart of Jesus that little phrase—'even as He was'—has given us! He had been severe in His demands upon His physical strength, and He was tired. Overcome by weariness, He sank back in the stern and fell asleep. The disciples began to sail and the disciples cried out in their excitement. He had slept on."

"What strikes us here is that He had learned to relax," to use the language of the modern world, "and He had learned to sleep. And He composed Himself to sleep, and as comfortable as a child. He used the custom of his people. Some people break down because they have never learned to relax. Their work done, they cannot rest. Their minds are still busy. If we are to work to the full, we must learn to drop the yoke swiftly and easily. He who is both mind and body, Jesus, is an example in this way."—H. C. Gillie.

Suddenly there arose a great wind storm, and the waves came into the boat so that it began to fill. There have always been sudden and violent storms on the Sea of Galilee.

Experienced sailors thought they were the disciples were frantic with fear. They had been battling with the elements and losing, and they shouted to Jesus, "Teacher, save us, for we perish!" He arose and rebuked the wind, and said unto the sea, "Peace be still." The Greek word translated "be still" means literally "be quiet." He spoke to the sea as though to a raging animal. And the wind ceased, and there was a great calm.

"Strong Pilot who at midnight hour Could claim the sea with mighty power. Grant us the skill to aid the bark Of those who drift in storm and danger."

"Why are you fearful?" said Jesus questioned, "have ye not yet faith?—not yet, after having seen my power exercised so many times?"

Many a follower of Christ thinks he has faith, but his faith fails him in times of storm and stress. Then he murmurs, "Teacher, say, 'I have ye not yet faith?'"

CORRESPONDENCE.

STAMP OUT THE DEPRESSION

The Editor:—May I have a little of your valuable space to put forward a plan which I believe will do some good in the next few months—a plan which I put into effect myself, I feel sure, will do good in western Canada out of the present depression and on to its feet again.

I would say at the outset that I am not a man who believes that the present economic system is antiquated and that it should be replaced by the needs of modern society. What I am suggesting is not far forward into the future, but it is a plan to shore up our present business structure and save it from a total collapse until we have time to examine and repair the foundation of our present system of doing business.

There is no need to describe the present situation in western Canada. There we are frequently told that we are much better off than other places. Yet the fact remains that because farm produce prices are so low the farmer has no purchasing power, and therefore, most lines of business are shrivelling up like prunes in a hot sun. Almost any business man who has been in the west for more than a few years will tell you that the farmer has no purchasing power, and therefore, most lines of business are shrivelling up like prunes in a hot sun.

At the same time it is generally said that nature did not throw us down. We have had everything we need, but we lack the medium of exchange to obtain our necessities with one another. If we can get a plan that will save our business, we should be able to agree that it must be man made. I propose a method of quickly shoring up of sight in the quicksand of the present situation.

I would suggest that every farmer and business man should join forces in an effort to put an end to the continuing hunger and poverty which is the result of the present situation. If the present conditions are allowed to continue, hunger and poverty will dispose of their livestock such as pigs, sheep, and poultry. Many who are now holding out with interest will, if they put in at crop all, be still here holding out with interest.

Many of the world's economists are agreed. I submitted my plan to Dr. Irving Fisher of Yale, and the reply I received was that it was a plan that would do something to help the situation. If the present conditions are allowed to continue, hunger and poverty will dispose of their livestock such as pigs, sheep, and poultry. Many who are now holding out with interest will, if they put in at crop all, be still here holding out with interest.

Turning Plague Into Profit

Research Workers Plan To Make Good Soap From Locusts

The world's worst pest, that of the locust, which in Asia and Africa alone regularly invades about 15,000,000 square miles, equal to about 20 per cent of the land area of the globe, may yet prove a blessing in disguise.

A remarkable instance of how commerce is turning waste into wealth comes from Africa, where it looks as if Tunisia will develop a new industry, and what has previously been regarded as a costly plague will become a source of profit. French research workers have discovered that excellent soap can be made from locusts and it is announced that factories for making this by-product may be established all along the new Trans-Saharan Railway, the project recently authorized by the French government.

The locusts are dried in the sun, and then treated with soda ash to remove their degree of dryness. The oil thus obtained is then purified by steam and used for making soap. In addition, French fertilizing firms have been negotiating with the government for the purchase of dried locusts which will be salted and dried for export.

Although the pest from the pest is thousands of years old, up to the present locusts have dealt every device of man to conquer them. This year a locust horde of 10,000,000 feet of wire netting was stretched across Northern Central Argentina, and in the Sudan, where invasion is an hourly possibility, about 100,000 of poison are kept stored at strategic points.

France, Italy, and delegates from the British empire met last week at a conference at Rome to consider schemes of international co-operation against the pests. London is now recognized as the international research center. Information on the movements of locusts is now being received from 16 locust-infested regions in 15 countries by the Imperial Institute of Entomology, and analyzed there in order to trace the origin of locust swarms, the cause of their invasions, and the probable cause of the outbreaks.—World-Wide News Service, Inc.

Use Canadian Ports

Diverting Of Trade Through Domestic Ports Is Noted

"One of the outstanding accomplishments of Canada in 1932 was the diverting to a large extent of Canadian trade through domestic ports in keeping with the frequently enunciated policy of Hon. H. H. Stevens, Minister of Trade and Commerce," says the weekly review issue by that department. "This was most noticeable in the exports of wheat."

The review shows that of the 138,477,449 bushels of wheat cleared from the beginning of the crop year, August 1, to the end of January, nearly 80 per cent passed through Canadian ports as compared with 50 per cent of \$32,755,000 bushels cleared in the corresponding period of the preceding crop year.

Clearences through Montreal showed an increase of 80 per cent, and through Pacific coast ports, an increase of nearly 60 per cent. The quantity of wheat cleared through maritime ports was nearly seven times greater than in the previous year.

Clearences through the new port of Churchill increased from 544,769 bushels to 2,756,000 bushels while those through United States ports dropped from 16,714,000 bushels to 15,542,000 bushels.

Air Service To Canada

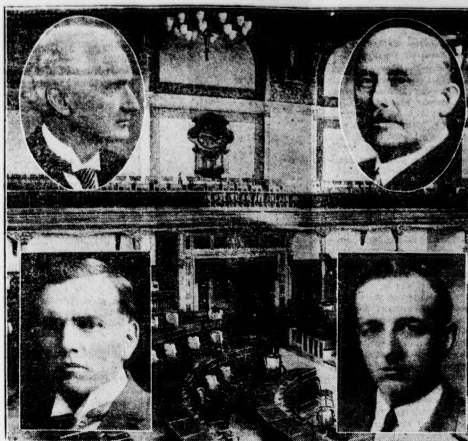

Probability of a regular British air service across the Atlantic within two or three years was forecast by Sir Eric Geddes, chairman of Imperial Airways, Limited. The service would connect up with Canada and possibly parts of the empire in the Pacific Ocean. Sir Eric was also confident that it would be a second-year service from London to Cape Town within two years.

A scientist declares that if he really wishes for a certain person to come to him, that person always arrives. We wouldn't mind letting him have never tried this little trick in our restaurant.

The instance of a highest South Carolina man driving a car after having denied a license, recalls the number of headless persons who do this same thing.

REDISTRIBUTION BILL—NO NEW TAXATION—FEATURES IN ONTARIO LEGISLATURE

With the opening of the new Ontario Legislature, several important bills came before the House. One of the most prominent is the redistribution act which will reduce the Ontario Parliament membership at least twenty-two seats. The Prime Minister suggested that there would be no new taxation unless absolutely vital at a moderate deficit was more justified than higher levies. Above, top left, is His Honor the Lieutenant-Governor Dr. Bruce, who opened the Legislature for the first time since taking over the office. Top right is the Hon. G. S. Henry, Prime Minister, while bottom, left and right, are W. E. N. Sinclair and H. C. Nixon, leaders of the Opposition parties. The main picture shows the interior of the Legislature looking towards the Speaker's Gallery. The members' seats are arranged in the shape of a horseshoe.

Secluded In Le, or Camp

Five Women and Four Men At Lazaretto in New Brunswick

Stricken by the scourge most dreaded in the history of man and doomed to exclusion within the bounds of the Lazaretto at Tracadie, New Brunswick, are nine lepers, five women and four men, from various points in Canada.

Most of the patients are above middle age. One a great war veteran, contracted the disease in France, but a diagnosis of his trouble was not made until three years later. Last summer a Chinese was discharged from the institution as cured and deported to his native country.

The Lazaretto at this village, overlooking the Gulf of St. Lawrence, from the north shore of New Brunswick, and one in British Columbia, are the only two institutions of their type in Canada. They are maintained by the Dominion Government.

Leprosy originated in New Brunswick in 1758 according to the most commonly accepted theory. At that time the French vessel "Indulgence" which had been in the Levant trade, stranded near the Miramichi River. The plague broke out shortly after the seamen began mingling with the people. Many fishermen of the district died from the disease, and others, panic-stricken, fled to points along the coast. Later, the plague appeared at Carleton Place and was ordered by law to be taken to Sheldrake Island, at the mouth of the Miramichi. Then the establishment was moved to its present site at Tracadie.

For many years the lepers remained uncared for and lived under revolting conditions. At last the Dominion Government took a hand in the matter, and in 1868 the Hotel Dieu nuns of Montreal went to Tracadie to devote their lives to the unfortunate.

The Lazaretto has been remodelled and renovated several times. It is a thoroughly modern institution, with well lighted and ventilated, spacious wards. At one time more than 40 lepers were congregated here. Between 1910 and 1920, 14 new patients were admitted and 21 died.

Kinda Crew Honored

A huge lunch wreath preserved in a block of ice arrived at Berlin on the steamer "Mogador," a gift of the Australian Government to the German navy. It is in recognition of the heroism of the crew of the famous cruiser "Goeben" who were saved by the Australian cruiser "Sydney," Nov. 9, 1914.

Stage Manager (discussing chorus girl who has been given a song singing part)—"Well, what do you think of her?"

Producer—(A peach—but no Melba.)

"Our economic prof talks to himself. Does yours?"

"Yes, but he doesn't realize it—he thinks we're better off."

Would Repeat Order

Turkeys Will Find Ready Market in London Next Year

Mr. W. A. Brown of the Dominion Live Stock Branch has returned from Great Britain where he was associated with the marketing of the Christmas trade of about 50,000 fatted poultry. The shipment, which consisted mostly of turkeys, went over in "chilled" instead of the usual frozen condition, therefore came in direct competition with the home-killed rather than imported stock. He reports that because of the quality and attractive presentation of the shipment, which was sold chiefly in London, the stock immediately attracted the attention of the wholesalers and was quickly sold at favourable prices. He was given the assurance of the trade that a shipment of equal quality for the next Christmas season could easily be doubled in quantity without overstocking the market.

Russians Selling Silver

Prasants Can Now Exchange It For Food and Clothes

Silver Russia is being swept by a silver-rush that outdoes Britain's great gold-rush recently.

All over the republic hungry, ill-clad peasants are "cashing in" on gold halves, forks, spoons, ornaments—anything containing silver. The reason is that "Torgsin" shops, in which roubles are worthless and only foreign gold currencies are accepted, have now agreed to take silver as well.

Hordes of old silver have been produced, the owners waiting in long queues to exchange their valuables for food, clothes and luxuries obtainable only at "Torgsin."

It is estimated that there are 50,000,000 tons of platinum in the sun in the form of a gas.

Mut Be Good Grade

Farmers Can Depend On Fertilizers Sold In Canada

Of the almost innumerable brands of fertilizers offered to the public in the earlier days of the fertilizer business in Canada there were hundreds of brands which contained no real actual plant food that they were practically worthless for the purpose for which they were purchased. This condition led to the inclusion of a clause in the Fertilizer Act, 1922, requiring that every fertilizer sold in Canada contain not less than 12 per cent of available plant food as nitrogen, phosphoric acid and potash singly or combined. In 1923 this minimum of total plant food in any fertilizer was raised to 14 per cent, which is the requirement still in effect. During the first year of the operation of the 14 per cent total plant food requirement hundreds of brands of so-called fertilizers were put out of the market.

This provision of the Act established a reasonable basis of minimum plant food content and undoubtedly has meant a material saving to farmers in the purchase of fertilizer and prevented many a disappointment in crop returns which would have resulted from the use of inferior and fraudulent material.

A Modern Kleg

The curtain tells the knell of parting day. A line of autos winds across the sea. A pedestrian plods his absent-minded way.

And leaves the world quite unexpectedly.

The petrified forest in Arizona contains 25,625 acres.

Recent gains in coal production in Canada are greater than a year ago.

A Lost Continent

Seeking To Find Atlantis In the Sahara Desert

Speculating on the whereabouts of the lost continent of Atlantis is a venerable pastime, though the most popular theory hitherto has been that it lies somewhere underneath the broad waters of the Atlantic Ocean with islands like Tenerife, perhaps, representing the mountainous peaks of its long-vanished territory. A French professor, however, is now setting off to look for Atlantis in the Hoggar Mountains of the Sahara. If he finds it there this speculative region may be regarded as rescued from a watery grave and transferred to land which is even drier than usual. Some of the old tales used to place the Elysian Fields in Atlantis, but this is not the idea which most people now associate with the Sahara. However, there are some grounds for assuming that the Sahara became a desert within comparatively recent times as the history of the world goes, and perhaps it was in those earlier times that the Hoggar Mountains acquired the more amiable traditions which hang round the Lost Atlantis.

Any event this seems quite a reasonable moment to go looking for new continents. Most of the old ones have the air of being a little too far away and if we could only cover one that had been lost for seven or eight thousand centuries there might be a chance for somebody to make a fresh start there, unimpeded by the political and pecuniary problems which are making most of man's life a struggle for existence and death-entail.—The Manchester Guardian Weekly.

Wider Markets For Canadian Tobacco

Product Is Now Being Shipped To Many Countries

Progress has been made in the production of high quality tobacco in Canada during the past five years. This has been accomplished by the interest of other countries have shown in the Canadian product. In 1927 the total exports of unmanufactured tobacco amounted to 5,867,470 pounds; in 1932 it rose to 9,614,000 pounds for the first eleven months, January to November, and in the December shipments in 1931 are added to complete the 12 months, the total is brought up to 10,438,464 pounds.

In 1927 the only countries purchasing Canadian tobacco were the British Isles, Netherlands and the United States. The bulk of these deliveries were made to Britain. In 1932 the total exports had not only nearly doubled but the number of countries interested in Canadian leaf tobacco included the United Kingdom, Barbados, Sierra Leone, Jamaica, Gambia, Belgium and the United States.

A feature of this expanded market has been the change in the type of tobacco shipped. In 1927 the bulk of the tobacco exports was Burley. In 1931 and 1932 this has largely been supplanted by bright leaf tobacco, grown in the southern part of the province, and shipped to Ontario. Improvement in the growing and curing of Canadian tobacco has been largely due to the work of the Canadian Experiment Station, the Experimental Farm at Harrow, Ontario, specializes in tobacco culture, production and marketing.

Operating Seventy Years

Metropolitan Was First Underground Railway In World

The London Metropolitan Railway, the first underground railway in the world to be constructed, has celebrated its 70th birthday. In January, 1863, Lord Gladstone and a distinguished company were drawn in open coaches through the first tunnels, and afterwards partook of a banquet at Farringdon Street Station. There were apprehensions at the time that the opening of the railway that passengers would be suffocated by the fumes.

Plenty of people still living who remember the underground in those school days will agree that these apprehensions were by no means groundless. Until comparatively recent years the trains were drawn by ordinary steam locomotives, and the smoke which gathered in the tunnels used to be held forth the whole of the day into the railway stations. Carriages were lighted by flickering oil lamps. At this was changed when the present Metropolitan and District Railways were converted to electric power.

One of Greenland's two wireless stations, that at Scoresby, has burned down.

February, on the average, is the least rainy month of London's year.

Gardening Notes

(By Gordon Lindsay Smith.)

Days are growing longer, sunshine warmer, and on the hillside sloping to the south the snow is gone and the ground begins to steam at noon. Seed catalogues and the new birds have arrived and old gardeners are beginning to plan before the frost. We would be well advised to follow their example. Much more satisfactory results can be achieved in growing flowers and vegetables where one looks into the thing before work actually begins, while it is practically hopeless to attempt any comprehensive scheme without a good plan, well studied and roughly drawn to scale.

Flower Plans

There is a lot of fun in planning our lay-out now and of trying to picture just how this will look when mature. We think of changes, of adding a path or a trellis, perhaps of some new colors, of developing another vista from the porch or living-room window, or of softening or screening some harsh lines that are too apparent in our present scheme. Like the fisherman, we have almost as much pleasure in making our preparations as we have when we actually get under way.

It is a good thing to make out a rough plan on paper. Notes must also be made of color, height and time of blooming. Each garden will have its own peculiarities and it is well that such should be the case as it allows us a splendid opportunity of developing individuality, a most important feature in these days of standardization. There are bound to be certain dark corners where we have had trouble before, but when we realize that such places are the best places to adapt to growing in shady places and that there are certain flowers such as lobelia, pansies, Begonias, Pansies, Godetia, Lobelia, Clarkia and Foxglove, which actually prefer to get away from the full sun, the job of handling these spots is simplified.

Then, there are hot, dry corners where nothing but weeds seem to thrive. These are flowers for this location also, the Pinks and Nasturtium, for instance, asking nothing better. A few Nicotiana, Evening Stock and other similar flowers will fill the evening air with spicy fragrance. The orderly person will insist on a little special plot, down behind the regular borders, where a supply of flowers are grown for bouquet purposes. These are a few of the things to remember when we take up pencil, seed catalogue and, perhaps, a Government Bulletin tonight and let our thoughts run wild on what we are really going to do this time.

Vegetables

The great fault with most vegetable gardens in Canada is that they are too small. But we can have just as many different kinds here as in the showy part of the garden if we plan to plant the same things on a steady look-out for new things, earlier and better varieties and the development of a continuous supply of vegetables. The first sprouts are ready in the spring until the Brussels' sprouts in December. As a general rule, vegetables should be planted in rows like corn, peas, lettuce, beans, and carrots, two or three types should be used. By banding the vegetable end of the garden in this way the supply is increased and the season extended.

Fish By Air

Rapid Transit To North Hurries Delivery To Points East and South

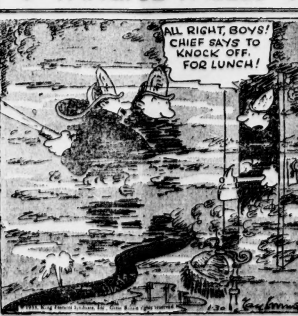

Within half an hour after white fish are caught in the lakes of Northern Manitoba they are delivered to a point by aeroplane on the Hudson Bay Railway, 35 miles away, for transit from The Pas, Man., by rail to other points in Canada and the United States where they are in demand. Formerly the 30-mile journey by horse outfit and tractors took two days over rough trails.

The inland fisheries of Canada are among the country's most valuable resources. The fish caught in large quantities for the commercial market in Manitoba come from Lake Winnipeg, Lake Winnipegosis, Lake Manitoba and the smaller lakes. White fish and pickerel are the chief fish caught, but pike, tullibee, goldeneye, and several other varieties are plentiful.

Because swarms of locusts in Brazil made the rails so slippery that trains were delayed, locomotives have been fitted with special brushes to clear the lines.

The Chinese minister of railways is expected to give his consent to the making of an automobile road on the Great Wall of China.

TOWN & COUNTY Personalographs

The annual general meeting of the
Carbon Lawn Tennis Club will be held
in the Municipal office on Thursday,
February 23, at 8 p.m., to elect officers
and organize for the coming season.

Stan Carney, Sandy Reid, H. Evans
and Tim Brown comprised a rink entered
in the Skewell's bonspiel last
week. They were successful in winning
first in the consolation event.

The next game of junior hockey is
scheduled to take place in Carbon on
Saturday afternoon.

The meeting of the Women's Auxiliary
which was to have been held on
March 1st, has been postponed to
March 8th, and will be held at the
home of Mrs. John Manley.

Mrs. Jos. Ramsay spent the week
end in Calgary.

Mrs. Van Loon, Mrs. T. Barber and
Mrs. McNaughton returned on Friday
after attending the annual meeting of
the Women's Auxiliary in Calgary.

Mr. and Mrs. H. C. Wilson spent
Friday and Saturday in Calgary.

A number of Carbon hockey fans
attended the Miners-Branks hockey
game in Calgary on Saturday.

Dr. McParlane has a new Chevrolet
Sedan, purchased through the local
dealer, Garrett Motors. Mr. Garrett is
also sporting a new Chev. coach.

Mrs. T. J. Ramsay spent a few days
in Calgary and returned on Monday.

Miss Winnie Poxon returned from
Calgary on Sunday.

The weather is mild and spring-like
but we are looking for a colder snap
for our bonspiel next week.

A number from Carbon attended the
Masquerade at Hesketh on Friday
night last.

The Young People's Society of the
Baptist Church of Bethel will hold a
musical program in the Furness Ex-
change hall on Sunday night, February
26th, at 7:30 p.m. Rev. Kijah of
Calgary will address the gathering for
a few minutes at the close of the program.
Everybody is welcome.

Look over the Builders' Hardware
Rues ad on the front page. Now is
the time to prepare for the spring
work and they offer many attractive
lines for your consideration.

Don't forget the carnival tomorrow
night at the local skating rink.

Nearly half of Carbon motored to
Drumheller on Tuesday night to see
the Branks win the third game in the
playoffs of the Southern Alberta association.

While it pays to be honest you often
are a hour time collecting.

Lots of us are looking for the path
of least persistence.

IN MEMORIAM

In loving memory of our dear husband
and father, Alfred Puffer, who
passed away February 26, 1931.

A voice from our household is gone.
A voice we loved so dear;
A place is vacant in our hearts,
Which never can be filled.

The loss was great, our grief severe,
To part with one we loved so dear.
The blow was hard, we'll not complain,
But hope in Heaven to meet again.

From his wife and mother,
ANNETTA PULLER & DAUGHTER

CARBON TRADING CO.**Let Us Do Your Printing?**

All business houses need more or less printed matter, all of which
is within the possibilities of the local printer. Yet how prone
many are to pass up the home printer and let the orders go to
city offices which have no interest whatever in rural communities
except to get printing orders and the cash to pay for them. Business
men, remember that the home paper is constantly promoting
the interests of the home community and you owe it to your-
self and your local paper to back up these efforts by at least having
your printed matter done locally.
